

Audityzer Community Guidelines

Our Mission

To build the world's most comprehensive and collaborative security auditing platform through open research, ethical hacking, and community-driven innovation.

Core Values

1. Security First

- All contributions must prioritize security and privacy
- Follow responsible disclosure practices
- Maintain confidentiality of sensitive information
- Respect ethical hacking principles

2. Collaboration Over Competition

- Share knowledge and expertise freely
- Support fellow researchers and developers
- Provide constructive feedback and mentorship
- Celebrate community achievements

3. Innovation and Excellence

- Strive for high-quality contributions
- Embrace new technologies and methodologies
- Continuously improve platform capabilities
- Push boundaries of security research

4. Inclusivity and Respect

- Welcome contributors from all backgrounds
- Maintain professional and respectful communication
- Value diverse perspectives and experiences
- Create safe spaces for learning and growth

Community Standards

Communication Guidelines

- Use clear, professional language
- Be patient with newcomers and questions
- Provide helpful and actionable feedback
- Avoid inflammatory or discriminatory language

Contribution Standards

- Follow coding standards and best practices
- Include comprehensive documentation

- Provide thorough testing and validation
- Respect intellectual property rights

Conflict Resolution

- Address disagreements constructively
- Seek mediation when needed
- Focus on technical merits over personal preferences
- Escalate to community moderators if necessary

Enforcement

Community guidelines are enforced by our moderation team. Violations may result in warnings, temporary restrictions, or permanent bans depending on severity.

Reporting

Report violations or concerns to: security@audityzer.com or through GitHub's reporting mechanisms.
